Cricket Player Performance Tracking Application: CRICKSTATS

User Story

As a Salesforce Administrator, I want to build a centralized player performance management system using Salesforce so that match-wise player statistics can be captured, analyzed, and reported efficiently. This system should reduce manual work, improve data accuracy, and provide meaningful insights through reports and dashboards to support better decision-making.

1. INTRODUCTION

1.1 Project Overview

CRICKSTATS is a Salesforce-based application developed to manage and analyze sports player performance on a match-by-match basis. The application uses Salesforce custom objects, relationships, automation, reports, and dashboards to store structured data and generate insights.

This system helps coaches, team managers, and analysts to monitor player statistics, track performance trends, and make data-driven decisions.

1.2 Purpose of the Project

The purpose of this project is:

- To digitize player performance records
- To centralize player and match data
- To reduce manual data handling
- To improve accuracy and accessibility of statistics
- To provide real-time analytics using Salesforce
- To automate calculations and updates using flows

2. IDEATION PHASE

2.1 Problem Statement

PS No	Customer	Trying to	Problem	Because	Feeling
PS-1	Coach	Track player	No accurate data	Data stored	Frustrated

PS No	Customer	Trying to	Problem	Because	Feeling
		performance		manually	
PS-2	Team Manager	Maintain player records	Time consuming	Manual updates	Stressed
PS-3	Analyst	Analyze performance trends	No analytics system	No centralized data	Dissatisfied

2.2 Empathy Map Canvas

Target Users

- Coaches
- Team Managers
- Analysts
- Salesforce Admins

Empathy Analysis

- **Think & Feel:** Need accurate and fast data
- **Hear:** Feedback from management
- **See:** Multiple files and spreadsheets
- **Say & Do:** Manual data entry
- **Pain:** Errors and delays
- **Gain:** Automation and real-time insights

2.3 Brainstorming

Ideas Considered

- Web-based tracking system
- Mobile statistics app
- Salesforce CRM-based solution
- Dashboard-driven analytics

Final Idea Selected

- Salesforce-based Player Performance Tracking Application (CRICKSTATS)

3. REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

- Login to Salesforce
- Add Player Details
- Record Match Performance
- Generate Reports
- Analyze Dashboards
- Make Decisions

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	Player Registration
FR-2	Match Performance Entry
FR-3	Automated Calculations
FR-4	Reports Generation
FR-5	Dashboards

Non-Functional Requirements

Usability

- Simple UI
- Easy navigation
- Minimal training required

Security

- Role-based access
- Secure authentication
- Permission sets

Performance

- Fast data loading
- Quick report generation

Scalability

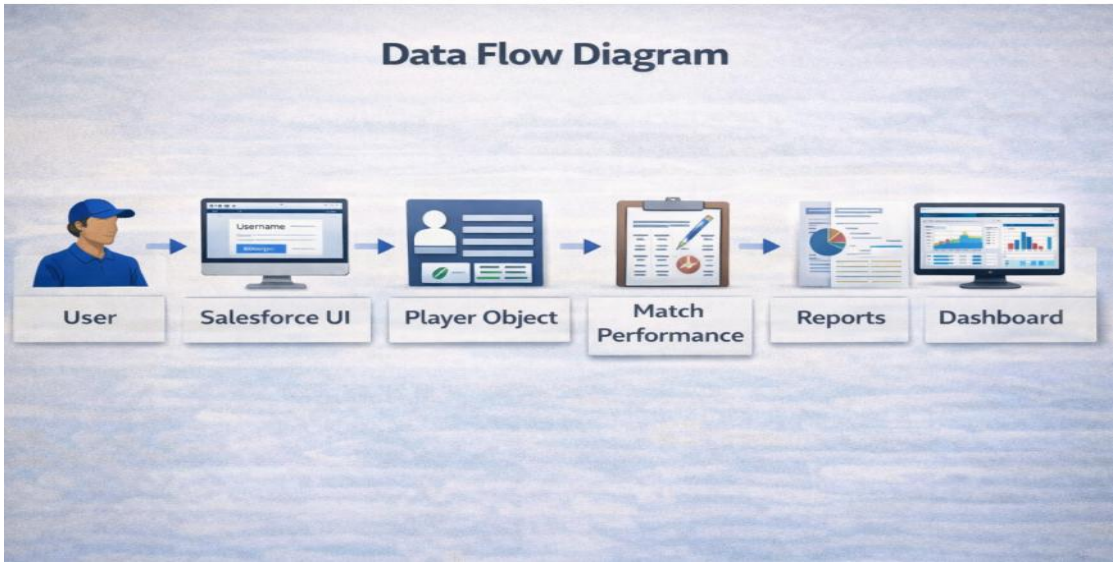
- Supports large volume of records
- Handles multiple users without performance issues

Availability

- 24/7 cloud access
- Minimal downtime

3.3 Data Flow Diagram

User → Salesforce UI → Player Object → Match Performance Object →
Roll-up Summary Fields → Reports → Dashboards



3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Analytics	Reports & Dashboards
Automation	Salesforce Flows
Backend	Salesforce Objects
Database	Salesforce Cloud

4. PROJECT DESIGN PHASE

4.1 Problem – Solution Fit

Earlier, player performance data was maintained manually using spreadsheets and documents, which resulted in data inconsistency, errors, and delayed analysis. CRICKSTATS resolves these issues by providing a centralized Salesforce platform where all player and match data is stored securely.

Automated roll-up summaries and flows eliminate manual calculations, while reports and dashboards provide real-time insights. This system bridges the gap between traditional manual record keeping and modern cloud-based performance analytics.

4.2 Proposed Solution

CRICKSTATS provides the following:

- Custom Objects (Player, Match Performance)
- Master-Detail and Lookup Relationships
- Roll-up Summary Fields
- Salesforce Lightning App
- Screen Flows
- Interactive Dashboards

Key Features

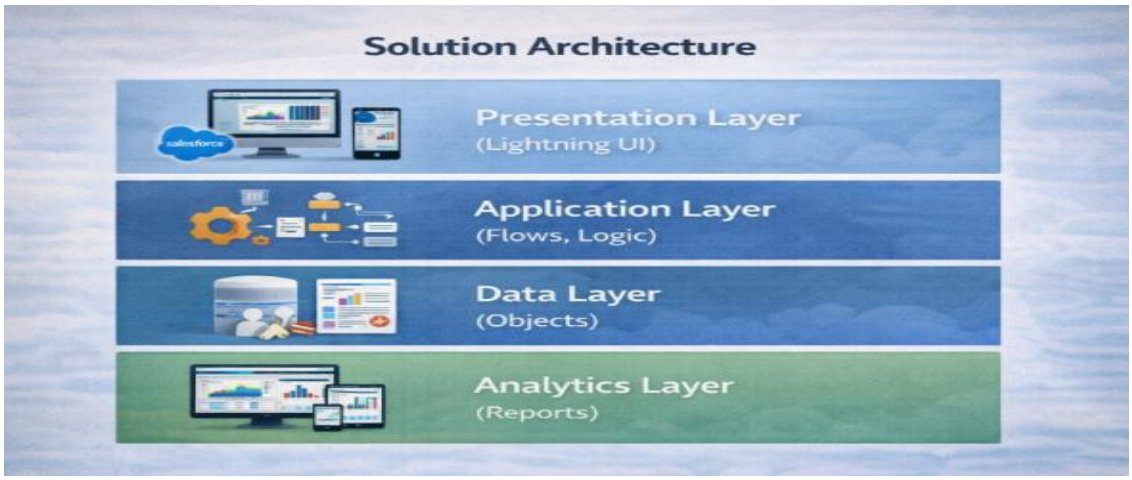
- Centralized database
- Real-time statistics

- Secure access
- Scalable design
- Easy reporting

4.3 Solution Architecture

Architecture Layers

- Presentation Layer – Salesforce Lightning UI
- Application Layer – Salesforce Flows & Logic
- Data Layer – Custom Objects
- Analytics Layer – Reports & Dashboards



5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile methodology followed
- Sprint-wise development
- Object creation → Automation → Reporting

Product Backlog, Sprint Schedule and Estimation

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce	1	High	Member1

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
			developer account so that I can configure and deploy the system.			
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Player and Match Performance objects so that player and match data can be stored systematically.	3	High	Member2
Sprint-2	Navigation	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage records within the application.	3	High	Member3
Sprint-2	UI Design	USN-4	As a coach, I want a dedicated Lightning App so that all performance tracking features are accessible from one dashboard.	3	High	Member4
Sprint-2	Data Structure	USN-5	As an admin, I want to create player and match fields so that complete performance details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Structure	USN-6	As a user, I want customized page layouts so that only relevant fields are displayed during data entry.	5	High	Member2
Sprint-2	Automation	USN-7	As a system, I want to validate player and match inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-	Automation	USN-8	As a system, I want automated flows to update	5	High	Member1

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
3			player statistics so that performance data remains accurate.			

Project Tracker, Velocity & Burn-down Chart

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on End Date)	Sprint Release Date (Actual)
Sprint-1	8	1 Day	05 Mar 2026	05 Mar 2026	8	05 Mar 2026
Sprint-2	10	1 Day	05 Mar 2026	05 Mar 2026	10	05 Mar 2026
Sprint-3	6	1 Day	06 Mar 2026	06 Mar 2026	6	06 Mar 2026
Sprint-4	4	1 Day	06 Mar 2026	06 Mar 2026	4	06 Mar 2026

Sprint Plan Overview

Sprint	Activity
Sprint-1	Developer setup & object creation
Sprint-2	Fields, page layouts & tabs
Sprint-3	Automation & flows
Sprint-4	Reports, dashboards & testing

5.2 Project Team Details

The **CRICKSTATS** project was developed by a team of students who collaborated throughout the project life-cycle including planning, development, testing, and documentation. Each team member contributed to specific modules to ensure successful project completion.

Team Composition:

Team Size: 5 Members

Member	Name	Role	Responsibilities
Member 1	SAFANAVRIN. S (Team Leader)	Salesforce Admin & Developer	• Developer org setup • Object creation • Field configuration
Member 2	HISANA SANOFER. M	Data Model Designer	• Relationships • Roll-up summaries • Validation rules
Member 3	AFRA THASNEEM. M	Automation & Flow Developer	• Screen flows • Automation logic • Data consistency
Member 4	SUMAIYA FAHIMA. J	Reports & Dashboard Developer	• Report creation • Dashboard design • Performance analytics
Member 5	SAFANA FATHIMA. S	Testing & Documentation Lead	• Functional testing • Performance testing • Project documentation and screenshots

6. PROJECT DEVELOPMENT PHASE

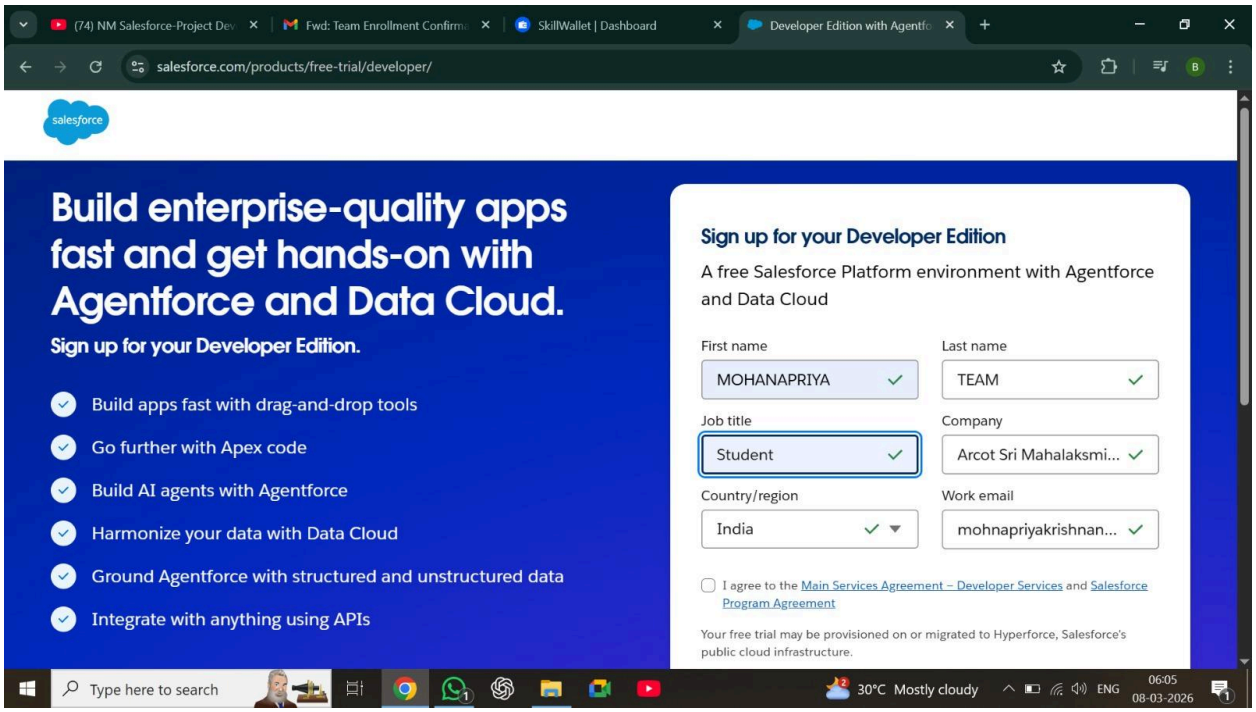
Project Flow

- Developer Account Creation
- Object Creation
- Tab Configuration

- Lightning App Setup
- Fields & Relationships
- Roll-up Summaries
- Automation using Flows

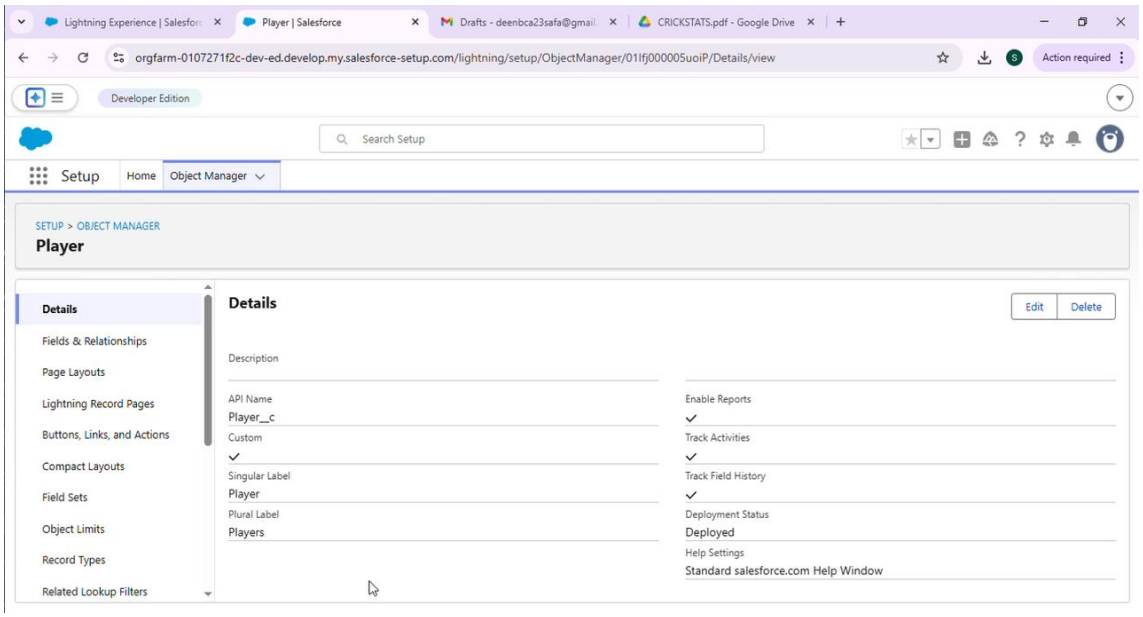
Milestone 1: Salesforce Developer Account Creation

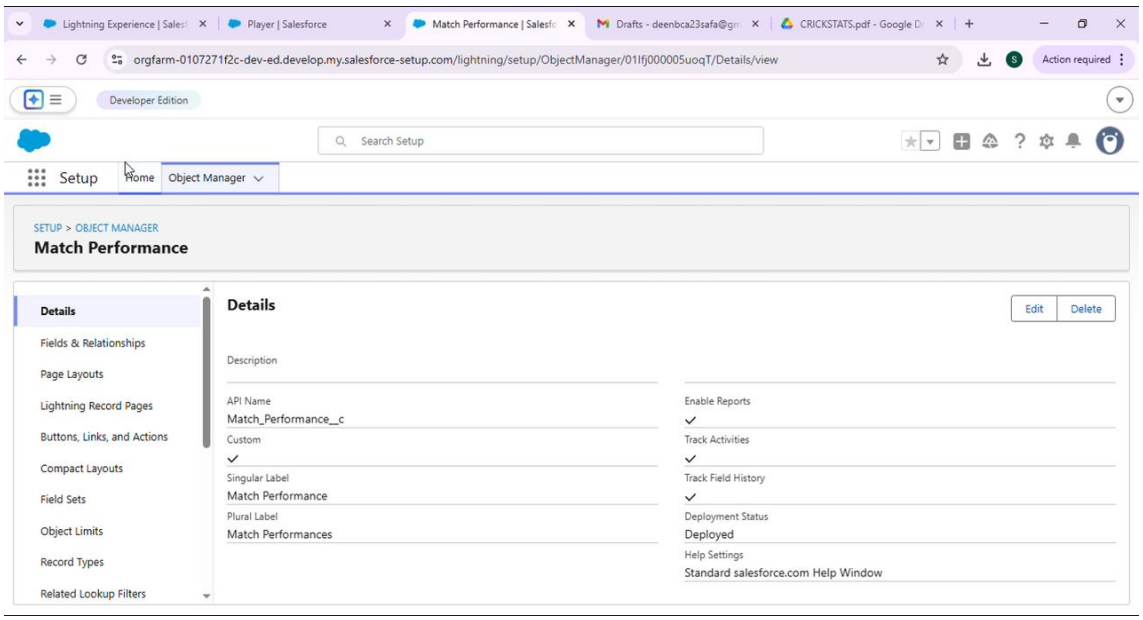
- Created Salesforce Developer Org
- Activated account using email verification
- Accessed Salesforce Setup



Milestone 2: Object Creation

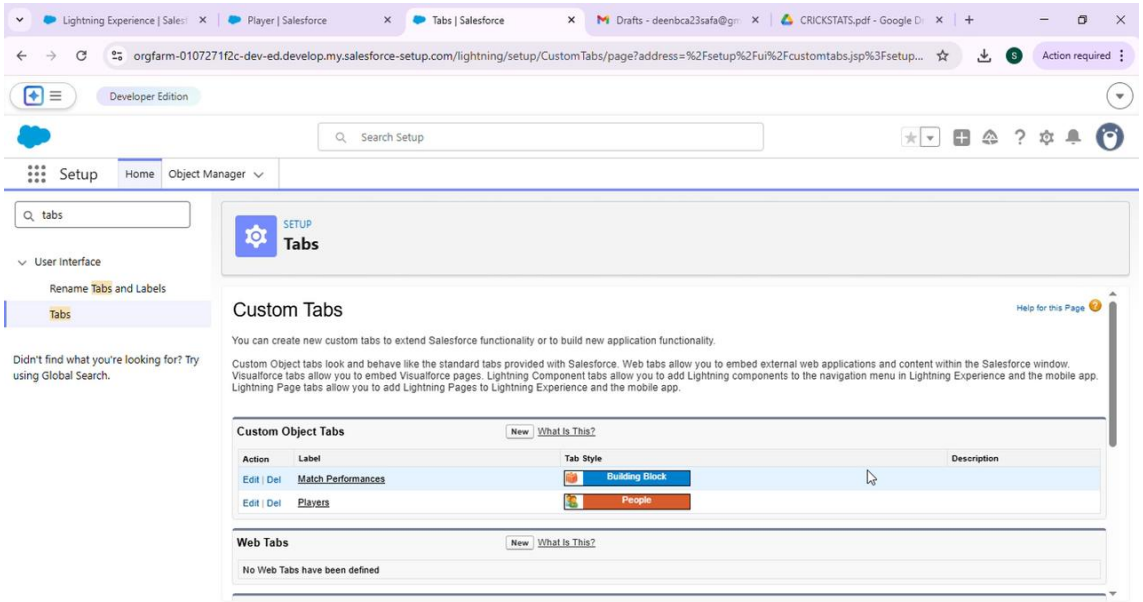
- Objects Created
- Player (Custom Object)
- Match Performance (Custom Object)





Milestone 3: Tabs Creation

- Custom tabs created for Player and Match Performance objects
- Tabs added to Lightning App



Milestone 4: Lightning App Creation

- Created Lightning App named **CRICKSTATS**
- Added custom and standard objects
- Assigned System Administrator profile

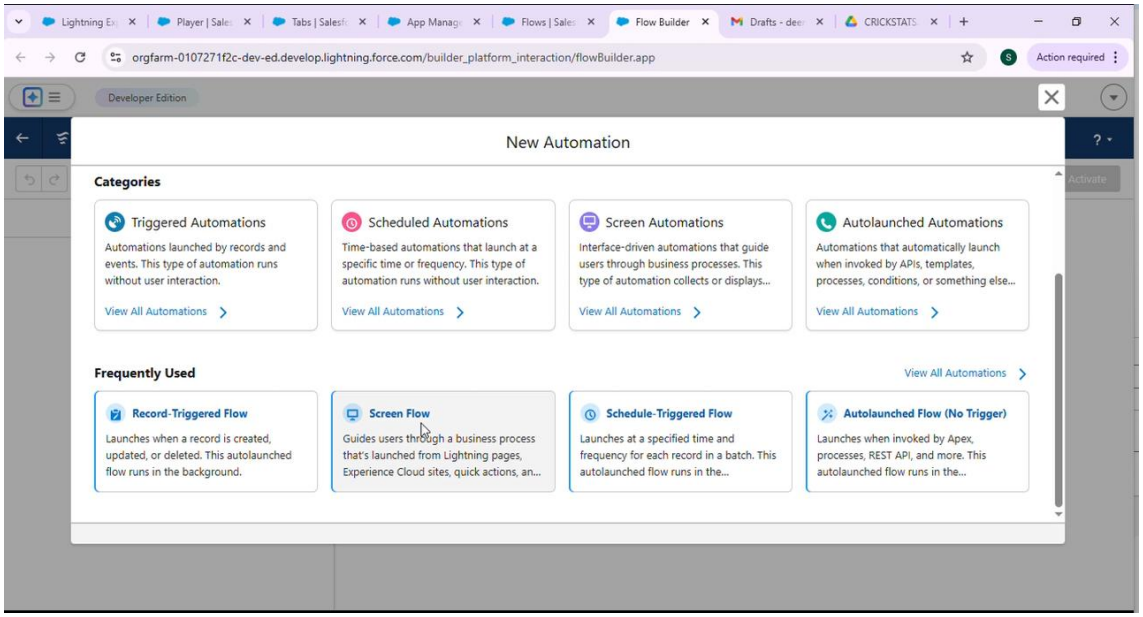
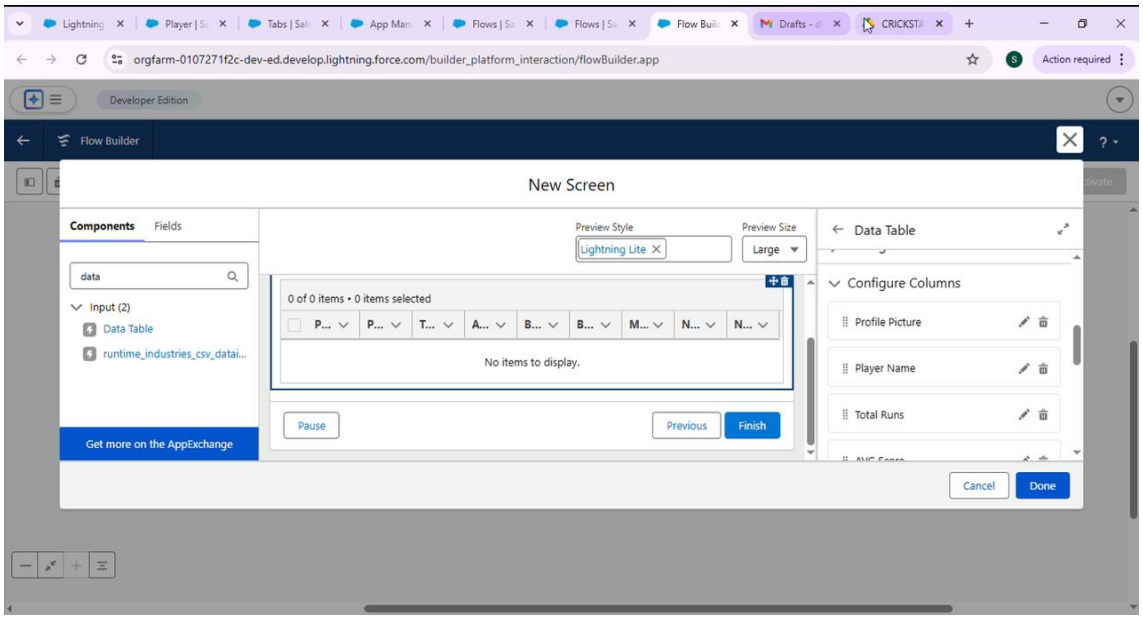
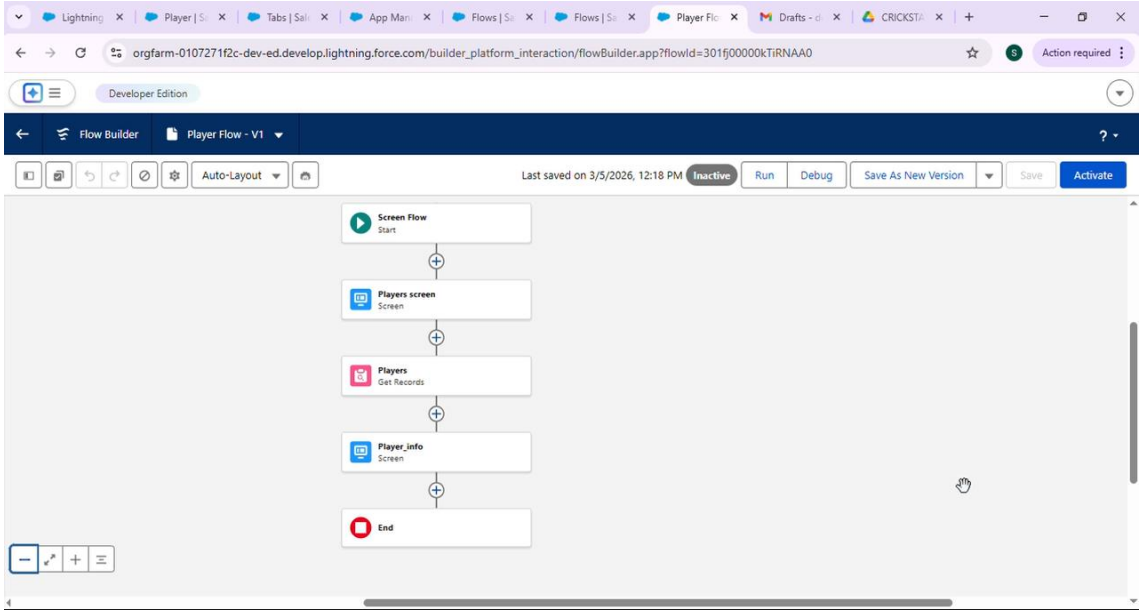
Milestone 7: Flows

- Screen Flow to filter players by team
- Display player performance using Data Table

- Flow embedded on Home Page





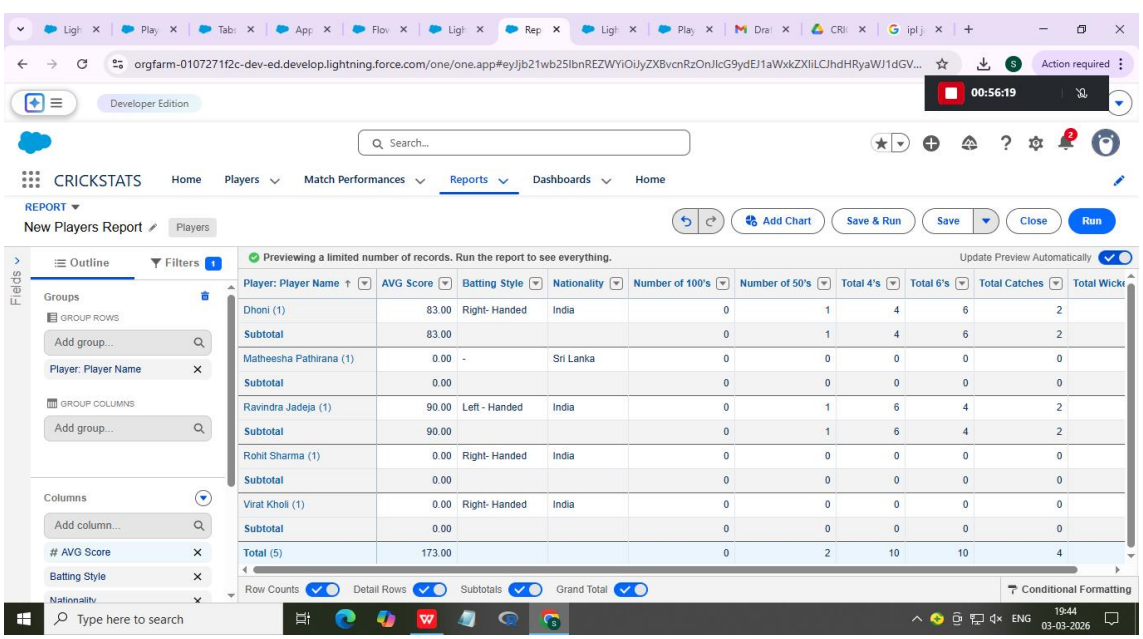


7. FUNCTIONAL & PERFORMANCE TESTING

Functional testing was conducted to validate record creation, field validations, roll-up calculations, and flow execution. Screenshots were captured to verify reports, dashboards, and automated updates.

Performance testing ensured fast page loading, smooth dashboard rendering, and quick report generation even with multiple records.

Report:



Player: Player Name	AVG Score	Batting Style	Nationality	Number of 100's	Number of 50's	Total 4's	Total 6's	Total Catches	Total Wicke

8. ADVANTAGES & DISADVANTAGES

Advantages:

- Centralized system
- Real-time analytics
- Secure data storage
- Reduced manual effort
- Scalable solution

Disadvantages:

- Requires internet connection
- Salesforce license dependency
- Limited offline access

9. CONCLUSION

CRICKSTATS successfully delivers a cloud-based player performance management system using Salesforce. The application automates data handling, enhances reporting accuracy, and supports informed decision-making. The project demonstrates effective use of Salesforce CRM, SDLC, and Agile practices.

10. FUTURE SCOPE

- Mobile application integration
- Al-based performance prediction.
- Advanced analytics
- Player ranking system
- Multi-team and multi-league support

11. APPENDIX

- Salesforce Objects & Fields
- Flow Configurations
- Reports & Dashboards
