Cricket Player Performance Tracking Application-CRICKSTATS

1. Student Details

Course: B.Sc Computer Science
Project Type: Team Project
Team Leader : MOHANAPRIYA.K
Team member : MALATHI.J
Team member : HEMALATHA.S
Team member : HARSHINI.M
Platform: Salesforce
Project Name: Cricket Player Performance Tracking Application – CRICKSTATS

2. Introduction

Cricket is one of the most popular sports in the world. Tracking player performance is important for analyzing player skills and improving team performance.

The CRICKSTATS application is designed to store and track cricket player statistics such as runs, wickets, matches played, and performance metrics.

This project is developed using the Salesforce platform, which allows efficient data management and easy access to player statistics.

3. Objective of the Project

The main objectives of this project are:

1. To develop an application for tracking cricket player performance
2. To store player statistics in a structured database
3. To provide an easy interface for viewing player information
4. To analyze performance using cricket statistics
5. To understand application development using Salesforce

4. Technologies Used

Technology	Purpose
Salesforce	Application development
Custom Objects	Store player data
Fields	Store statistics like runs, wickets
GitHub	Store project files

5. System Modules

1. Player Management Module

This module stores player information including:

- Player Name
- Team
- Player Role
- Matches Played

2. Performance Tracking Module

This module tracks the performance of players such as:

- Runs scored
- Wickets taken
- Strike rate
- Batting average

3. Data Management Module

This module manages the storage and retrieval of player data from Salesforce objects.

6. Project Implementation

The CRICKSTATS project was implemented using the following steps:

1. Logged into the Salesforce Developer Org.

2. Created a Custom Object named "Player".

3. Added fields for storing player statistics.

4. Created records to store sample player data.

5. Configured layouts to display player information.

6. Tested the system with sample cricket statistics.

7. Important Screenshots to Include

From your PDF, include only these important screenshots in the document:

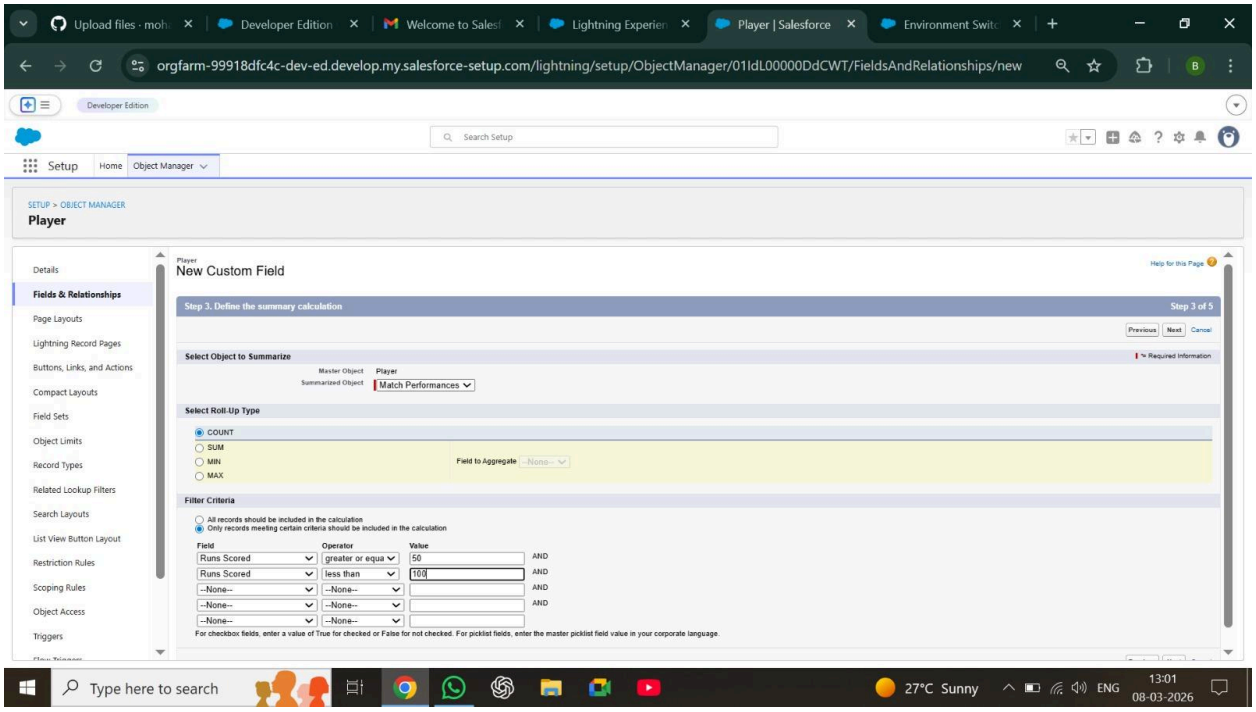
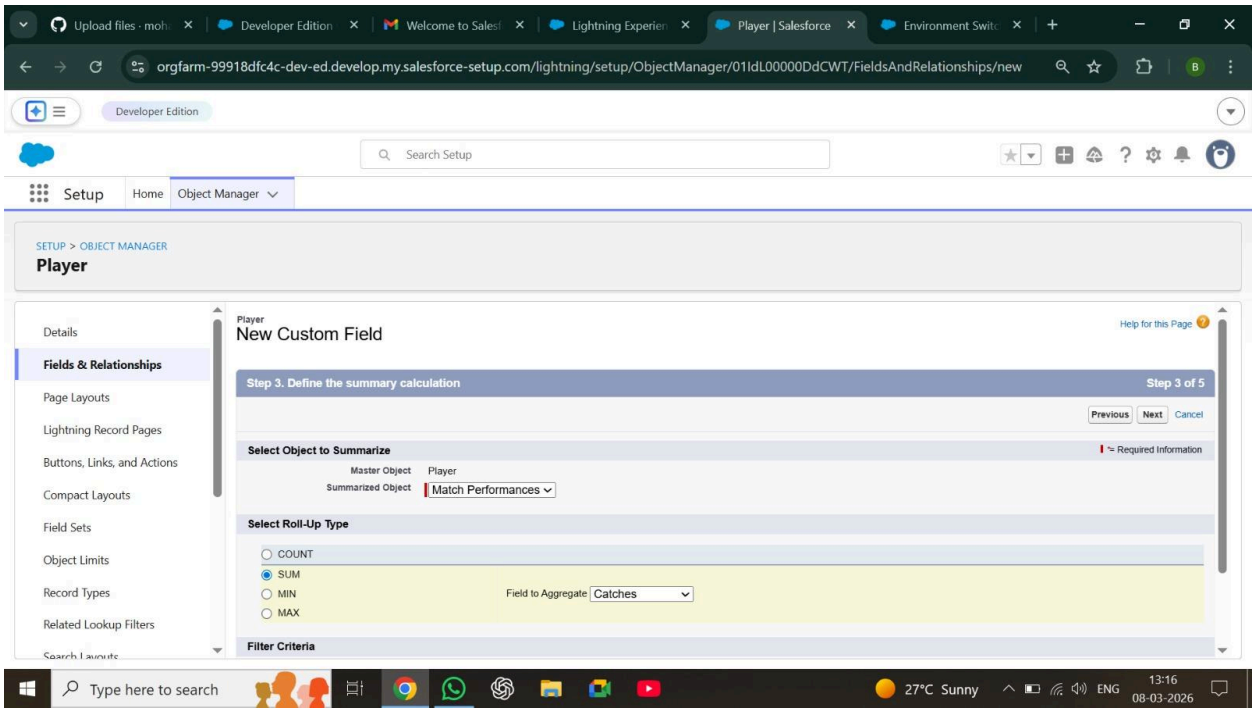
Salesforce Home Page / CRICKSTATS Application

Screenshot 2

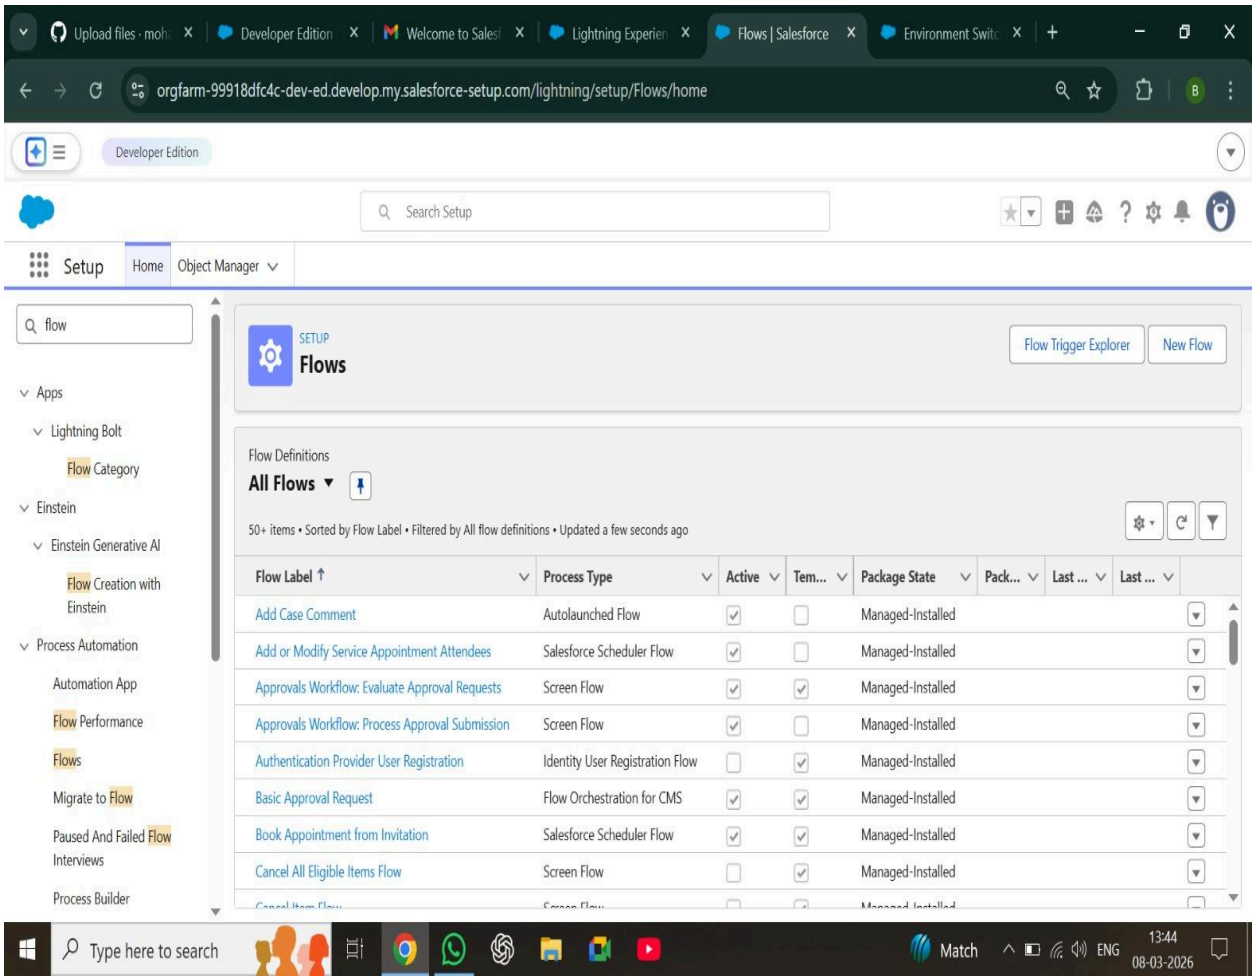


Custom Object Creation – Player Object

Screenshot 3



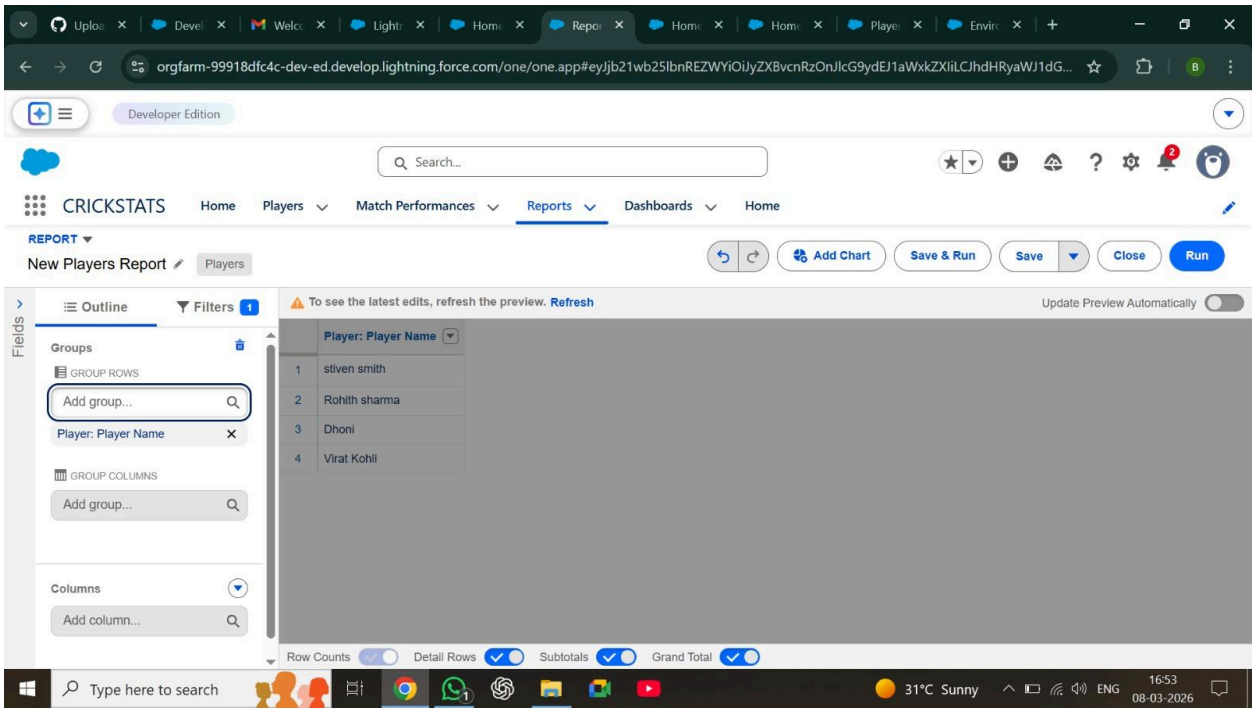
Fields Created for Player Statistics



Example fields:

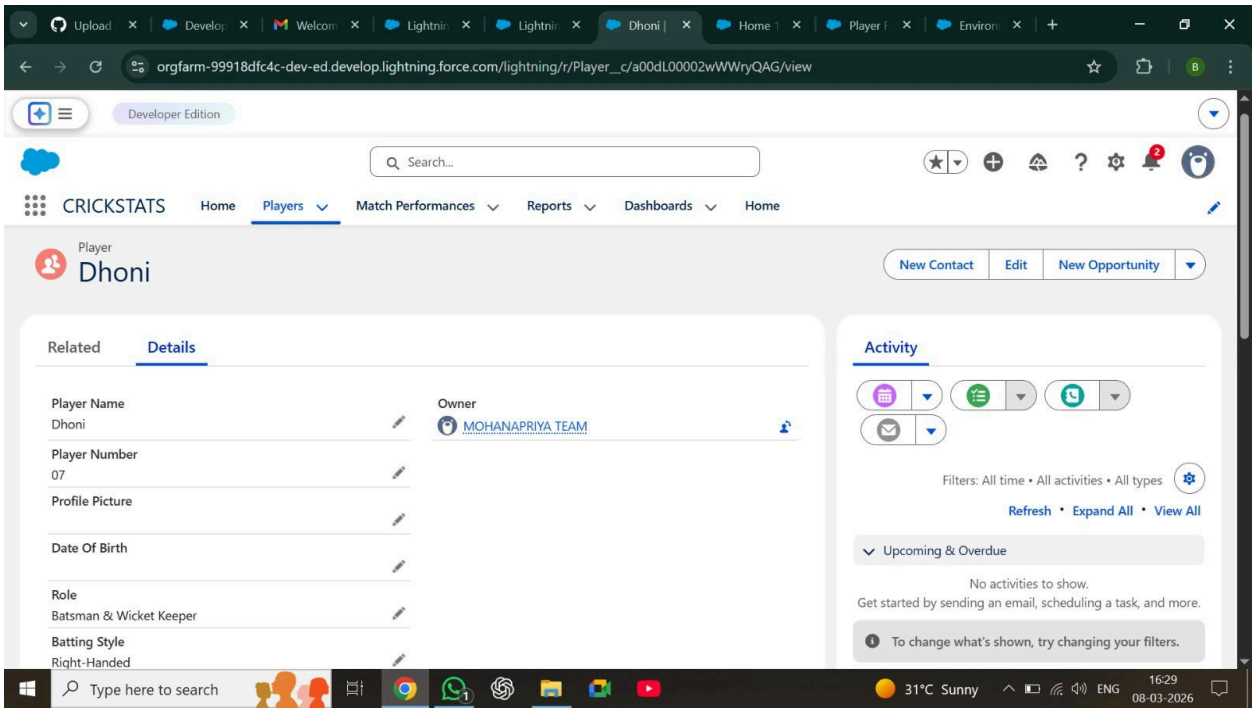
- Player Name
- Matches Played
- Runs Wickets

Screenshot 4



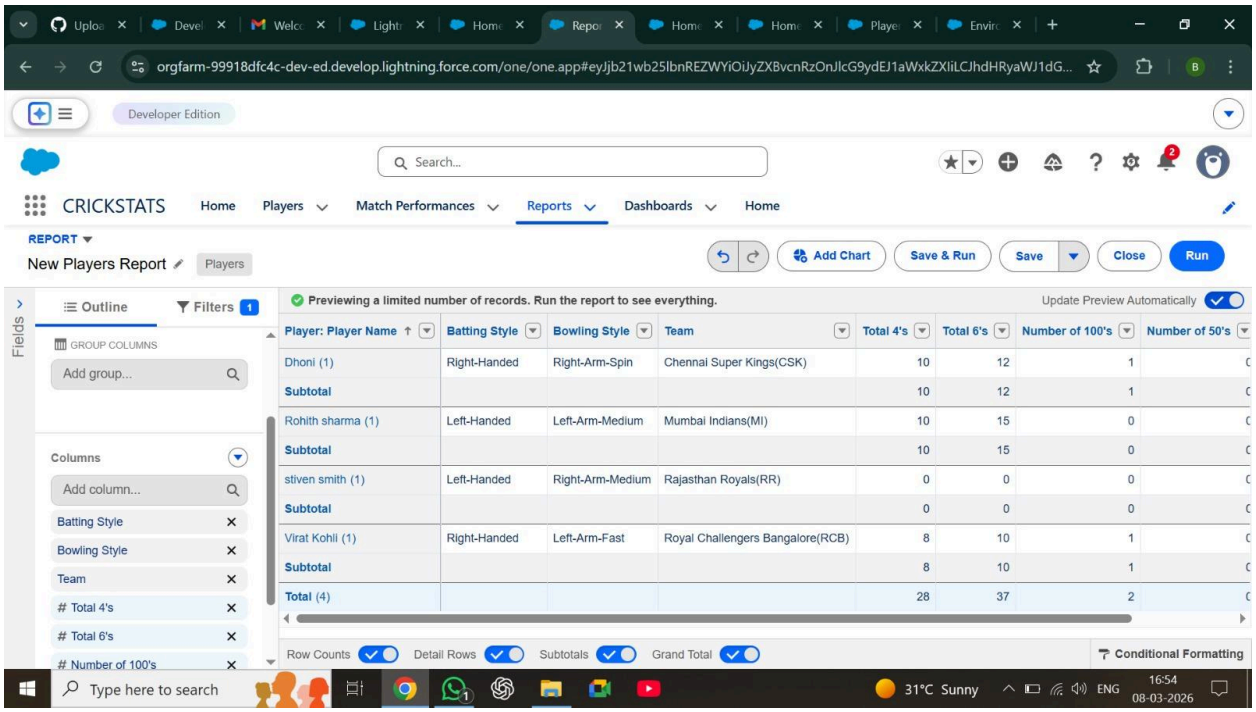
Player Record Creation Page

Screenshot 5



Player Record Details Page

Screenshot 6



Player: Player Name	Batting Style	Bowling Style	Team	Total 4's	Total 6's	Number of 100's	Number of 50's
Dhoni (1)	Right-Handed	Right-Arm-Spin	Chennai Super Kings(CSK)	10	12	1	0
Subtotal				10	12	1	0
Rohith sharma (1)	Left-Handed	Left-Arm-Medium	Mumbai Indians(MI)	10	15	0	0
Subtotal				10	15	0	0
stiven smith (1)	Left-Handed	Right-Arm-Medium	Rajasthan Royals(RR)	0	0	0	0
Subtotal				0	0	0	0
Virat Kohli (1)	Right-Handed	Left-Arm-Fast	Royal Challengers Bangalore(RCB)	8	10	1	0
Subtotal				8	10	1	0
Total (4)				28	37	2	0

Player Statistics Display

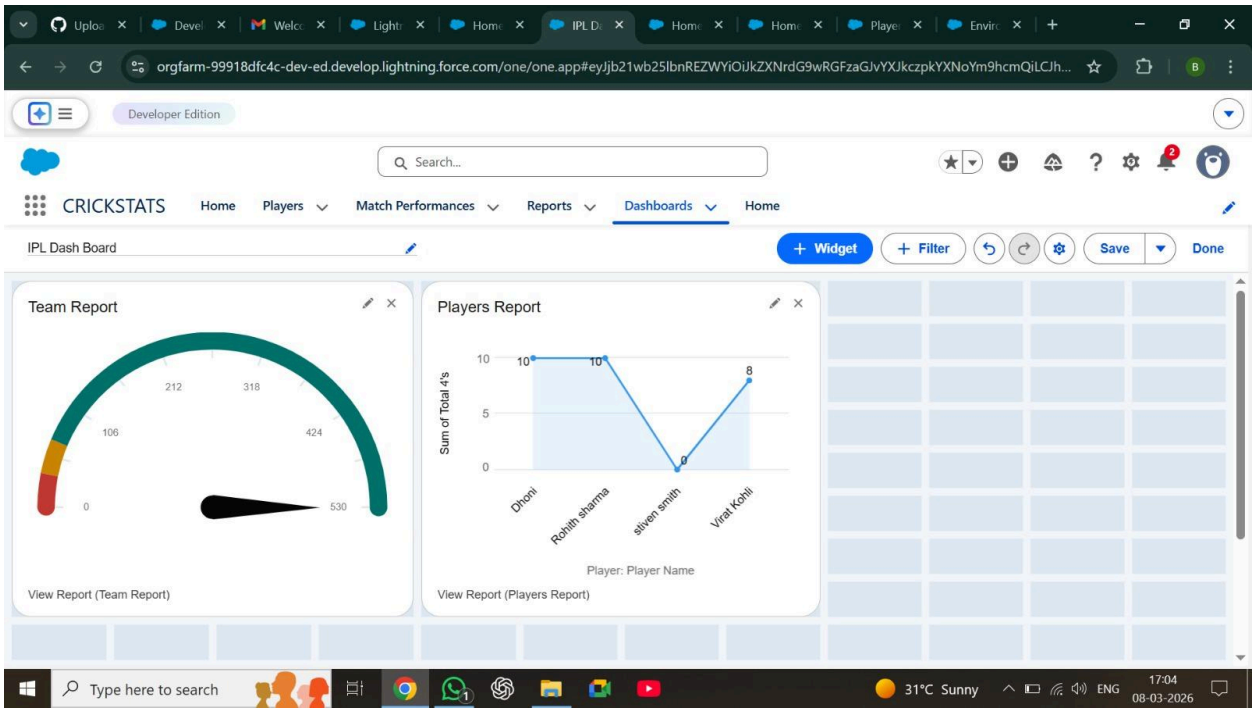
Application Layout / Page Layout

Screenshot 8



Final Output – Player Data Display

These screenshots show the complete project workflow.

8. Sample Data Table

Player Name	Matches	Runs	Wickets
Virat Kohli	275	12898	4
Rohit Sharma	250	10112	8
Jasprit Bumrah	90	250	150

9.Result

The CRICKSTATS application successfully stores and displays cricket player statistics. The system allows users to manage and analyze player performance effectively.

10. Conclusion

The Cricket Player Performance Tracking Application (CRICKSTATS) provides an efficient system for storing and analyzing cricket statistics.

This project helped in understanding Salesforce object creation, data management, and application development.

11. Future Enhancements

The system can be improved by:

- Adding live match statistics
- Creating data visualization dashboards
- Integrating AI-based performance analysis
- Developing a mobile-friendly interface
